

1300 Series

Rotating Control Head Device

1300 Series Rotating Control Head Device

Experience at Work for You

We specialize in customizing our products to meet your specifications

Application

- Divert drilling fluids and cutting to solids control equipment
- Gas influx and annular containment of wellbore fluids
- Air, mist & foam drilling
- Environmental protection
- Geothermal drilling

Features

- Compatible with rotary and top drive rigs
- Separate pieces - the bearing and mounting spools can be easily disassembled and reassembled
- The tapered bearing provides low torque rotation, excellent load support, & reliable performance.

Benefits

- Diverts air, fluid steam, gas and potential harmful wellbore fluids away from the rig floor through side outlet
- Simple and easy to maintain system

Bearing Specifications

Rotating Test Pressure	350 psi
Static Test Pressure	600 psi
Maximum Rotary Speed	150 rpm
Rotary and Top Drive Capable	Yes
Maximum Bearing Assembly Pass-Through	13 5/8"
Stripper Rubber Mounting	Screw-On
Oil System	Self-Contained Pressurized

Mounting Spool Specifications

Inlet Flange	Outlet Flange	Height
13 5/8" 3000 psi	9" 3000 psi	28 1/2"
13 5/8" 5000 psi	11" 3000 psi	28 1/2"

1300 Series Bearing

Swing Bolt Door

Outlet Flange
(Chromium Alloy to Improve Outlet Wear)

Dual Drilled 5M Flange
(10M Also Available)

24-Hour Rapid Response

Our representatives are in your area to handle all your service needs utilizing our 24/7 rapid response machine shop.

We specialize in customizing our products to meet your specifications.
